

# FREE PRINTABLE KIDS SHOE SIZE CHART

## HOW TO MEASURE

- 1 Place your child's heel against the solid line at the base of the chart.
- 2 Have your child put full weight on the foot, then mark the longest toe mark.
- 3 Measure the distance from the heel line to the longest toe mark.
- 4 Find the shoe size in the chart for the correct fit.

**Tip:** Measure both feet. It's common for one foot to be slightly larger, use the size that fits larger foot.

**Tip:** To ensure correct printing, place a credit card on the chart. If fits, the chart is printed to scale.

## SIZE CHART FAQs

### How often should I measure my child's feet?

Check every 2-3 months, as children's feet grow quickly.

### Do kids shoe sizes vary by brand?

Yes, different brands may fit slightly differently so it's best to check each brand's size chart.
